

WILMOD SULPHUR EVAPORATOR

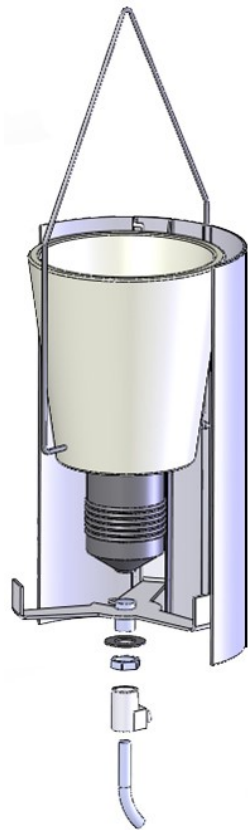

Energy efficient
Safe
Effective
Refill without cleaning

WILMOD SULPHUR EVAPORATOR

The WSE75 is a safe sulphur evaporator. The most important part of the WSE75 is the patented infrared (IR) heating element type SSV-II.

The unique sulphur pads contains 150 grams of sulphur per pad and are packed per 48 pieces in a carton. With an evaporation rate of 0,5 g/h one pad is suitable for a minimum of 300 hours of evaporation.

The WSE75 provides the following advantages:

- ENERGY EFFICIENT
Wattage only 75W
- SAFE
Operating temperature of the heating element (max. 190°C) remains below the ignition temperature of sulphur (230-260°C).
- EFFECTIVE
Due to the high evaporation rate very effective use of sulphur, and less time is required for evaporation.
- REFILL WITHOUT CLEANING
Using the unique sulphur pad makes dosing of sulphur easier and the cleaning of the SSV, when used correctly, becomes unnecessary!

TECHNICAL SPECIFICATIONS

- Wattage: 75 W
- Operating voltages: 110V or 230V
- IR heating element: SSV-II, E-27 Edison screw cap
- Cable lengths: 1.75 m, 3.00 m and 5.00 m with moulded-on plug (other lengths and plugs on request)
